Software Care/Maintenance/Update-Subscription 3 years

The update subscription ensures your right to receive most current updates to your licenses - you will receive all updates made available during your valid subscription period - providing clear plans of maintenance costs and of your software budget.
 The subscription fee is billed 7.5% of your current license value every quarter in advance. If the value of licenses purchased changes later (additional licenses or extensions like vapour option, price sheet changes) the subscription fee will be adjusted accordingly.
 The subscription starts in a quarter next to license purchase and is binding for three years. At the end of the 3 year term the subscription will automatically prolong for next 12 months yearly.
 Then, the subscription can be cancelled with a three months written termination notice.
 Same termination condition also applies earlier if particular list prices are raised more then 15% compared to previous quarter.
 Example: First subscription fee for orders placed in May will be billed in July.

Updates (ex. Of the Subskription)

For the rare case of licenses not covered by the update-subscription it is possible to update these older licenses to newest version with the payment of one time fee covering the past subscription period.
 The fee for the past subscription is calculated based on the number (rounded) of quarters passed since the order of the license to be updated (or the update of such) and the subscription fee (see Update-Subscription), and when more then 8 months discounted by 10%.
 In the case there is no identical current license variant matching exactly the license to be updated, then the next variant with equivalent capabilities has to be chosen for calculating the update fee.
 The update fee shall be not higher than the scheduled price of the current new license.
 Example: Last purchase of AnTherm license 3D/300k/DAMPF3D/DONGLE is 8 months in the past. The update to the current version 3D/300k/DAMPF/DONGLE having the license value of €3911,60 will be covered with the payment of the past update subscription: $€3911,60 * 7,5\%/Q. * 3Q. * 0,90 = €792,10$.

Purchase of licenses of any earlier versions (e.g. V.6) is not possible

Upgrades (functional growth))

Upgrades (functional growth) within current version
 Updating to newest version prior to extending it is required

2D-->3D; keeping cell limit if such package above available or must extend to next higher cell limit

Extending cell limit Functional/additional/extension options

Price delta+ € 60,00

Licensed use of the software is restricted, conditionally transferable, non exclusive and recoverable – according to license terms and conditions of use.

Volume discounts, surcharges and additional fees

Volume discounts (valid for license purchase within same functional variant and within one company at one and same location – e.g. at one factory or office premises)	Discount on Scheduled price
